

Company Press Release

Regarding: **Light Duty Self Close™ Slide**

Model Number: **3618 & 4678**

CompX is proud to introduce two new products in the self closing family of drawer slides: the 3618 and 4678.

The 3618 is a 2 1/2" wide slide with a slim 1 3/8" height and comes rated at a load capacity of 75lbs. Perfect for areas where space is tight, but premium slide action is needed.

The 4678 is also a 2 1/2" wide slide with a height of 1 7/8". A compact and durable slide, it is suitable for any application requiring self closing action with minimal space. Load capacity is 100lbs.

Both models are available with features such as lever disconnect and 32mm hole pattern and are perfect for applications such as kitchen cabinets or pedestal drawers. The 3618 and 4678 join the 3800 series self close slide with a load capacity of 200 lbs.

"CompX is a leading manufacturer of precision ball bearing slides, security products and ergonomic computer support systems. It operates from eight locations in the U.S., Canada and Taiwan and employs more than 1,200 people."
